THE INFINITI SOLAR BLIND

Key Features

INTRODUCING THE INFINITI Skylight

As a leader in the skylight industry in Australia, Natural Lighting Products understands that choosing the right skylight will have a major impact on the appearance, comfort, and energy efficiency of your property. Armed with the wealth of knowledge we acquired from 30 years in the industry, we have developed the INFINITI, a high-performance skylight specifically designed to suit Australia's harsh climate.

The INFINITI skylight is made of extra thick, double-glazed, toughened glass with a U-value of 1.5 for optimal thermal performance. Skylights with a lower U-value let less heat enter and escape, saving you money and reducing the environmental impact of your home. It also comes with self-clean coating, making it very low maintenance while providing year-round comfort.

The INFINITI is designed with no trim around the glass so that water is unable to pond. Furthermore, this gives the INFINITI a modern, cutting-edge look perfect for those looking to elevate the appearance of their spaces.

As part of dedication to our craft and our customers, Natural Lighting Products offers a 12-year warranty on the INFINITI skylight.

- ✓ Plastic-free
- ✓ Thicker toughened glass
- ✓ Frameless double-glazed
- ✓ Self-clean coating
- ✓ Fire-rated seal
- ✓ No water ponding
- ✓ Powder-coated extruded aluminium frame

HAIL RESISTANCE & SOUND REDUCTION

The INFINITI's double-glazing gives excellent protection against hail and acts as an acoustic barrier insulating your home from intrusive external noise.

99% UV PROTECTION

The INFINITI blocks out 99% of UV light, thereby protecting the people and furnishings in your property from its harmful effects.

ACRYLIC UPGRADE OPTION

Replacing your old acrylic dome skylight is a simple process using the all new INFINITI Skylight on an existing base.

PROUDLY

Built for Australia

Natural Lighting Products is a 100% Australian-owned company based in Sydney and Brisbane with distributors throughout Australia. We have over 30 years of experience in providing natural lighting solutions for both residential and commercial customers. Throughout this time, we have built our reputation in the industry as being committed providing unsurpassed customer service. From the smallest tubelight in your walk-in wardrobe to large scale atriums in shopping centres and public facilities, Natural Lighting Products can provide a solution that meets your specific needs.

At our production facility in Sydney, we manufacture our own branded skylights and build custom solutions to fit client specifications. Our range of offerings is second to none, including not only fixed skylights, openable skylights and tubelights, but also roof hatches and solar-powered ventilation systems. As proof of our commitment to the industry, all our products comply with relevant Australian Standards and we offer a seven-year warranty on all products and installation services.

FAST & SIMPLE

Easy To Install

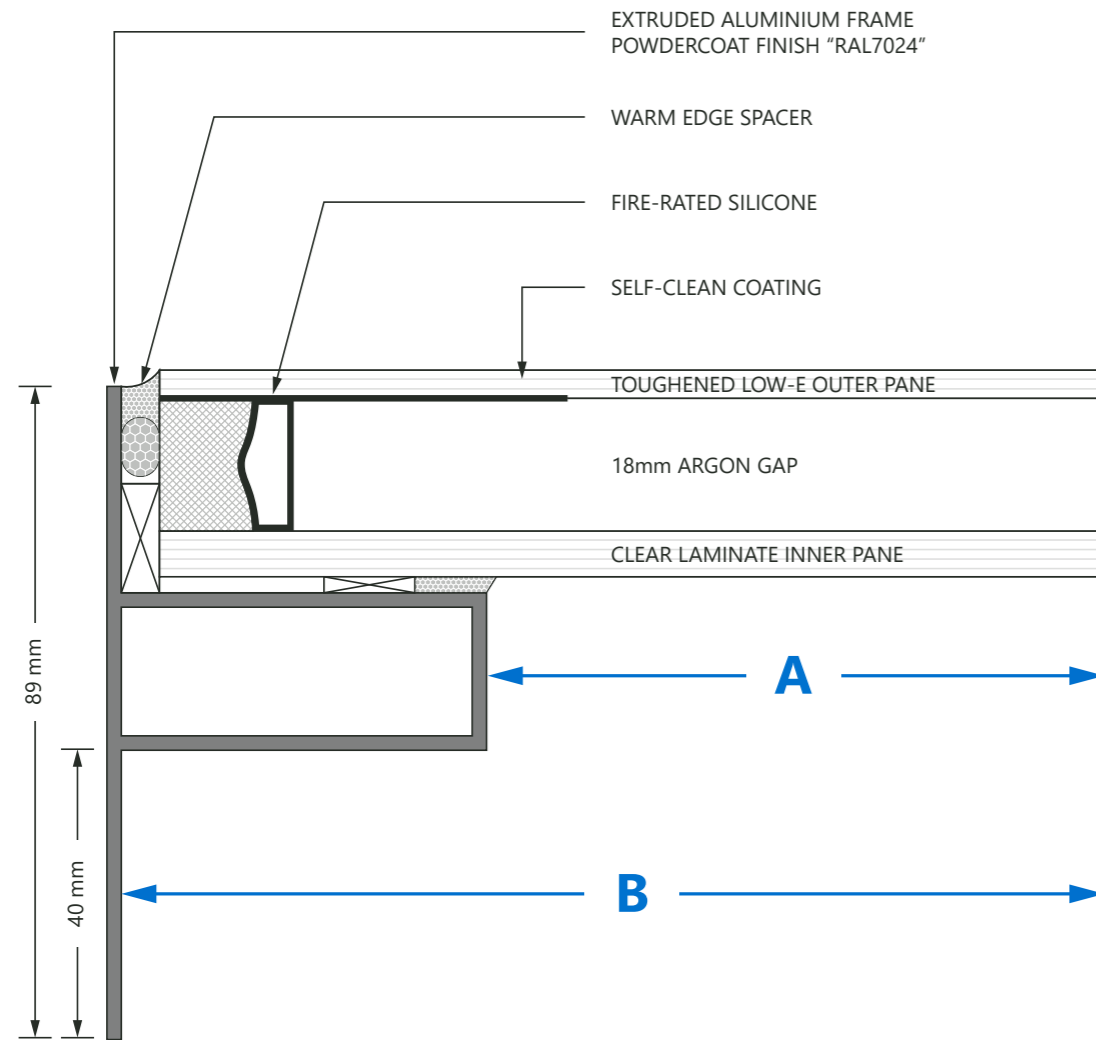

Designed to be quick and easy to install, INFINITI skylights will save you money on installation costs while also ensuring great performance for years to come.

INFINITI skylights can be installed from 1 degree to 85 degrees and come in a range of sizes (a separate flashing or hob will be required to install INFINITI to your roof profile).

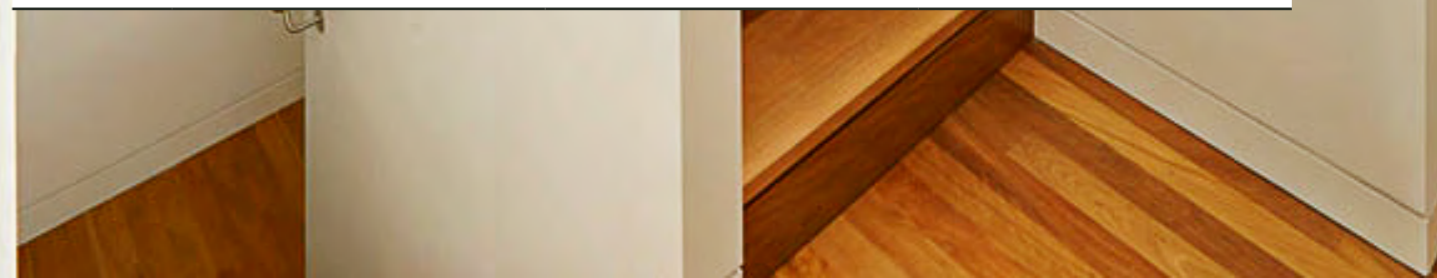

INFINITI SKYLIGHTS

Available in 8 Sizes

INFINITI skylights may be installed portrait or landscape to fit the design specification.
